

Liquid-to-Air CDU for AI Systems

The highest-capacity air-cooled CDU for the latest AI deployments with the performance, reliability & support that the world expects from CoolIT.

Highest Performance

Run the latest AI at full utilization with high pump pressure and cooling capacity.

2x GB300 NVL72 Racks per CDU

Excellent Availability

Produced in volume and according to industry-leading QMS systems at CoolIT's Canadian manufacturing operations.

100 Units per Week

Global On-Site Support

Hands-on installation, commissioning and lifecycle support in over 80 countries to deploy and operate with confidence.

80+ Countries Worldwide

Deploy high-density AI servers in traditional air-cooled data centers with the AHx240.

No facility water required.
