

Scale Next-Gen AI Faster with CoolIT's CHx2000

Proven performance, trusted by hyperscalers and available today.

Proven AI Performance

Run dense AI clusters at full utilization with proven pump pressure and cooling capacity - in real deployments.

12x GB300 NVL72 per CDU

Cluster-Level Operation

Unified visibility, Redfish compatibility and group control across up to 20 CDUs to operate AI infrastructure efficiently at scale.

Group Control 20 CDUs

Reliable by Design

Protect mission-critical AI infrastructure through proven reliability and serviceable architecture built for continuous operation.

6MW FWT Capability

Available in Volume

Enable dependable planning with consistent capacity that keeps large AI programs on schedule.

100 Units per Week

Global On-Site Support

Hands-on installation, commissioning and lifecycle support in over 80 countries to deploy and operate with confidence.

80+ Countries Worldwide
